Scarlet
Hacks 2026

Sponsorship Package

Prepared By :
ACM @ ILLINOIS TECH

Event Overview

PURPOSE

ScarletHacks aims to inspire and empower college students to develop innovative solutions that address pressing issues in sustainability and social equity.With a strong focus on uplifting underprivileged communities, this hackathon is especially meaningful for the Illinois Tech community and the Bronzeville neighborhood, a historically underserved area in Chicago. Through ScarletHacks, we strive to create a space for students to use technology as a force for positive change, fostering sustainable solutions and empowering the communities that need it most.

AUDIENCE

scarlet hacks is open to all college students, undergraduate and graduate, who are passionate about making a difference through technology. We welcome students from Illinois Tech, throughout the greater chicago area and surrounding community colleges. This year, ScarletHacks is expanding its reach beyond Illinois Tech students to include participants from colleges across the Chicago area and community colleges. By including more voices and perspectives, we hope to attract top talent to develop impactful solutions for challenges that directly connect to our mission.

Themes & Tracks

FINTECH 01

Projects in this track focus on using technology to improve how people and organizations manage, move, and understand money. Solutions should enhance efficiency, security, transparency, and accessibility across financial systems—ranging from personal finance and payments to fraud detection, investing, and fintech infrastructure.

HEALTHCARE SYSTEMS & SOLUTION 02

Projects in this track focus on using technology to improve healthcare delivery, access, and outcomes. Solutions may enhance patient care, streamline clinical workflows, improve data interoperability, support mental and public health, or increase accessibility and affordability across the healthcare system.

Themes & Tracks

CORPORATE INNOVATION 03

Projects in this track focus on using technology to solve real-world business challenges. Solutions can improve operational efficiency, automate workflows, enhance collaboration, optimize supply chains, or create smarter enterprise tools. Examples include workflow automation, internal analytics platforms, productivity tools, resource planning systems, and innovative software for corporate operations.

ENVIRONMENTAL SUSTAINABILITY 04

Projects in this track target pressing environmental issues, encouraging innovations that contribute to a healthier planet. Examples include clean energy, waste reduction, sustainable agriculture, and climate change mitigation.

Marketing & Exposure

SOCIAL MEDIA PROMOTION

ScarletHacks will be regularly promoted on our social

media channels, including Instagram, LinkedIn,and Discord to build awareness before,during, and afterthe hackathon. Sponsors will receive dedicated posts across all platforms, highlighting your involvement, values, and contributions to the hackathon. Social media stories and event recaps will be tagged and linked to sponsors for added visibility.

EMAIL CAMPAIGNS

Inclusion in email announcements to all registered participants will help showcase your support and available opportunities with your organization.

HACKATHON WEBSITE

Sponsor logos are prominently displayed on our website, with different sizes based on sponsorship tier, linking to your company's website or career pages. Dedicated blog posts for all sponsors to feature your company's mission, values, and contributions to the event.

Marketing & Exposure

ON-SITE BRANDING

Sponsor logos on banners posters and digital screens at the event venue ensures consitent exposure toparticipants. The ScarletHacks team will design custom retractable banners and will provide logo placement on photo backdrops, prominently displayed for maximum impact in event photos and press materials. Sponsors will receive the opportunity to distribute branded merchandise and giveaways, helping sponsors make a memorable impact on participants.

PARTICIPANT ENGAGEMENT

Sponsors can connect directly with participants through workshops, mentorship sessions, coffee chats, and judging. These engagement opportunities allow your team to interact meaningfully with talented students. Sponsor representatives have the chance to speak at opening and closing ceremonies, to share your organization's mission and connect with attendees.

POST EVENT RECAP & MEDIA COVERAGE

Following the hackathon, the ScarletHacks team will create a detailed recap and share it on our website and social media channels, including sponsor recognition and highlights of the winning projects. Press releases and potential media coverage will highlight the event's success and our sponsor contributions, extending the impact beyond the hackathon itself.

Branded Tracks

A Branded Track is a specialized category where a sponsor "owns" a specific problem space. Rather than hackers building generic apps, they are incentivized to solve a challenge defined by your company. This effectively turns a portion of the event into your own private innovation lab, where dozens of teams spend 36 hours dedicated to your technology or industry vertical.

A Branded Track is not passive; it is highly interactive. To ensure the highest quality of submissions, the concept includes:

- The Launch Workshop: A dedicated 45-minute technical session to onboard hackers to your track.
- On-the-Floor Mentorship: Your team roams the hacking area, unblocking teams and steering projects toward your vision.
- Independent Judging: You own the judging process for your track, ensuring the winners truly represent your company's standards of excellence.
